

MASTER PLAN

The Our Lady of Grace (OLG) Master Plan represents the facilities through which we envision *Advancing Our Mission* for the next 75 years. OLG seeks to have an even greater impact by fostering more engagement, connectivity, and participation in our parish community and beyond.

Please keep informed by visiting our website www.olgparish.org/master-plan.

NOT TO SCALE

LEGEND

|---|---|
|  Priest Residence (PHASE 1) |  Gathering Space (FUTURE PHASE) |
|  Restroom Improvements, Activity Center, Kitchen, Cafeteria, Link Building, Preschool (PHASE 2) |  School Expansion, Parish Administration (FUTURE PHASE) |
| |  Infrastructure Support (FUTURE PHASE) |

MASTER PLAN PHASES

PHASE 1

Priest Residence:

Construction of on-campus housing for up to 5 parish, retired, or visiting priests to have a place to rest as well as close proximity to our church and school.

Campus Enhancements/Maintenance:

Replacement, repair, or enhancement of facilities or components needing attention across the campus (e.g., restrooms, roofing, landscaping, worship space—baptismal font, lighting, upholstery, stained glass).

PHASE 2

Restroom Improvements:

Renovation and expansion of the main church bathrooms into the current nursery space across from the Most Holy Trinity Adoration Chapel. Nursery will be relocated.

Activity Center:

Construction of a multi-purpose space with a new full size gym with a performing arts stage. The gym will be divisible into 2 smaller gyms with bleachers, dividing wall, locker rooms, equipment storage, concession/spirit store, and office space. The performing arts stage will be a permanent stage on the long side of the gym with auxiliary space for music equipment, costumes, make-up, and props. The Activity Center will be built on the old rectory site with a lobby space lining the inner courtyard wall of the gym with a main entrance for the school, trophy cases, and a reception area.

Kitchen:

Construction of a new kitchen between the current gym and alley; this includes a repurposed Frassati (youth) Room. This kitchen will be large enough to serve school lunches and parish/funeral meals.

Cafeteria:

Repurposing of the current gym into a new cafeteria, seating approximately 300 at one time. Tables and chairs will be movable, enabling this space to also serve as a large multi-purpose space with a high ceiling.

Link Building:

Construction of parallel rooms on the lower and main level of the school linking the church to the Activity Center, including classrooms, a new Frassati (youth) Room, multi-purpose atrium, innovative learning spaces.

Preschool:

Construction of a new preschool at the front of the Activity Center, close to the parking lot, for up to 120 children, ages 33 months to 5 years old.

Traffic and Parking:

Additional parking will be added, while improvements will be made for handicapped parking, preschool drop-off/pick-up, and school carpool and bus traffic.

FUTURE PHASES

Gathering Space:

Expansion of the current Commons for increased fellowship, including expanding the current Dining Room, pushing out the Marian Patio, and adding casual seating and a coffee bar. The current kitchen will become a smaller catering kitchen, as the sacristy expands into a portion of the kitchen and a reconciliation room(s) is added.

School Expansion:

Construction of additional classrooms, learning and multi-purpose rooms, as necessary.

Parish Administration:

Repurposing of the current middle school into parish offices and Cassidy Hall into dividable meeting and socializing rooms.

Infrastructure Support:

Repurposing of current parish offices to serve a variety of support needs.
